

## WHAT SCHOOLS SAY ABOUT POWERGISTICS

“We love the small form factor and security of the PowerGistics Tower. Space is always at a premium in any classroom and the PowerGistics Tower gives us easy access to the devices while taking up minimal space. The fact that you can easily verify the devices are present and charging without unlocking or opening the unit is another plus. Finally, the colours fit in well in our elementary classrooms and give the very utilitarian units a bit of design interest.”

Jeff Thweatt- Ezell-Harding Christian School

### SMALL FOOTPRINT

The PowerGistics wall mount towers save space with our vertical storage design. Expedite your transitions by implementing a split deployment strategy.

### TANGLE FREE CABLE MANAGEMENT

PowerGistics NEW design holds cables snug so students and staff have just enough cable to plug in their device, saving IT staff hours of untangling!

### STUDENT MANAGED

Students can easily manage charging of their devices with an open design for easy visual inventory and charging status.

### SPEED OF DEPLOYMENT

Tower device management allows students to manage their own devices during transition, saving instructional time.

# KEYFEATURES

## JUST-A-STAND 20

- 1 Steel Construction:** Built with steel supports, the Just-A-Stand was designed to handle a tower full of devices.
- 2 Stability:** Keeping with the small footprint of Towers by PowerGistics, the Just-A-Stand steel legs are angled to allow for maximum stability within a small space.
- 3 Adjustable:** Keeping your Just-A-Stand level is important. With an inch of play, you can make sure your PowerGistics Tower stands straight and tall.
